Fan adapter, InLine®, 200mm auf 140mm, for heat sink, black transparent

Art.-No.: 36021T

EAN: 4043718194643

Use this fan adapter to install a 200mm fan onto a heat sink which normally can only house a 140mm fan. Using a fan with larger diameter has a positive effect upon noise level, as these fans require far lower rotational speeds for the same air flow volume. Fan adapter made from black plastic and offers excellent price-performance ratio, including several screws and washers. Dimension: 200x200x43mm
